### Sarah Lloyd Stevenson Employee Post-Travel Disclosure of Travel Expenses Addendum #1

Description of all meetings and events per Senate Rule 35.2(c) (6): During the conference, I attended breakfasts and lunches each day with other congressional staff, conference attendees interested in government affairs, and HIMSS government relations staff.

I attended a dozen panel sessions on health IT, interoperability, and telehealth. Several sessions discussed the implementation of the recently passed MACRA law for Medicare, the problems with the HITECH law, and state regulations around telehealth reimbursement. Two sessions specifically featured updates on legislation on Capitol Hill, and another specifically discussed the state laws across the country for telehealth. I also participated in a meeting with other congressional staff and HIMSS leadership.

During my time at the conference, I had productive conversations with health IT professionals from across the country. The exposition floor featured booths with representatives from 1300 groups. I sent some time exploring the floor and discussing policy with these individuals.

Form RE-1

#### PRIVATE SPONSOR TRAVEL CERTIFICATION FORM

This form must be completed by any private entity offering to provide travel or reimbursement for travel to Senate Members, officers, or employees (Senate Rule 35, clause 2). Each sponsor of a fact-finding trip must sign the completed form. The trip sponsor(s) must provide a copy of the completed form to each invited Senate traveler, who will then forward it to the Ethics Committee with any other required materials. The trip sponsor(s) should NOT submit the form directly to the Ethics Committee. Please consult the accompanying instructions for more detailed definitions and other key information.

The Senate Member, officer, or employee MUST also provide a copy of this form, along with the appropriate travel authorization and reimbursement form, to the Office of Public Records (OPR), Room 232 of the Hart Building, within thirty (30) days after the travel is completed.

Hŧ	althcare Information and Management Systems Society (HIMSS)
De	scription of the trip: Educational experience to attends HIMSS' Annual Conference and Exhibition
— Da	tes of travel: February 20 - 23, 2017
Pla	ce of travel: Orlando, Florida
	me and title of Senate invitees: Please see attached list of Senate invitees
I <i>c</i> a	ertify that the trip fits one of the following categories:
×	(A) The sponsor(s) are not registered lobbyists or agents of a foreign principal and do not retain or employ registered lobbyists or agents of a foreign principal and no lobbyist or agents of a foreign principal will accompany the Member, officer, or employee at any point throughout the trip.  -OR-
	(B) The sponsor or sponsors are not registered lobbyists or agents of a foreign principal, but retain employ one or more registered lobbyists or agents of a foreign principal and the trip meets the requirements of Senate Rule 35.2(a)(2)(A)(i) or (ii) (see question 9).
X	I certify that the trip will not be financed in any part by a registered lobbyist or agent of a foreign principal.
	-AND -
	I certify that the sponsor or sponsors will not accept funds or in-kind contributions earmarked directly for the purpose of financing this specific trip from a registered lobbyist or agent of a foreign principal or from a private entity that retains or employs one or more registered lobbyists or
	agents of a foreign principal.
l ce	agents of a foreign principal.  rtify that:
_	

9.	USE ONLY IF YOU CHECKED QUESTION 6(B)  I certify that if the sponsor or sponsors retain or employ one or more registered lobbyists or agents of a
	foreign principal, one of the following scenarios applies:  (A) The trip is for attendance or participation in a one-day event (exclusive of travel time and one overnight stay) and no registered lobbyists or agents of a foreign principal will accompany the Member officer, or employee on any segment of the trip.  -OR -
	<ul> <li>(B) The trip is for attendance or participation in a one-day event (exclusive of travel time and two overnight stays) and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee on any segment of the trip (see questions 6 and 10).         <ul> <li>OR −</li> </ul> </li> </ul>
	(C) The trip is being sponsored only by an organization or organizations designated under § 501(c)(3) of the Internal Revenue Code of 1986 and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee at any point throughout the trip.
10.	USE ONLY IF YOU CHECKED QUESTION 9(B)  If the trip includes two overnight stays, please explain why the second night is practically required for Senate invitees to participate in the travel:
11.	An itinerary for the trip is attached to this form. I certify that the attached itinerary is a detailed (hourby-hour), complete, and final itinerary for the trip.
12.	Briefly describe the role of each sponsor in organizing and conducting the trip:
	HIMSS develops, organizes, and conducts all aspects of the trip and conference. HIMSS17 is the largest
	healthcare sector conference, bringing together thought leaders from the healthcare community, including
	providers, medical informaticists, IT experts, vendors, and federal and state government representatives.
13.	Briefly describe the stated mission of each sponsor and how the purpose of the trip relates to that mission: HIMSS is a cause-based, not-for-profit organization focused on better health through IT. HIMSS leads eff-
	orts to optimize healthcare engagements and outcomes using IT, providing thought leadership, education
	and market research. HIMSS represents 64,000 members, 640 corporate members and 450 non profits.
14.	Briefly describe each sponsor's prior history of sponsoring congressional trips:
	HIMSS holds its Annual Conference every year, and invites congressional staff, as well as federal, state,
	and local policymakers and government officials, for this unique learning experience.
	<u>.                                    </u>

	HIMSS hosts education	nal briefings and roun	dtables with federal a	and state officials, and	health IT experts,	
	covering relevant policy	/ issues. HIMSS enga	ages in various educa	tional events, includir	ng our interoperabil	
	ity showcase, which de	monstrates the latest	technology and inter	operability advancem	ents.	
6.	Total Expenses for Eac	h Participant:				
		Transportation Expenses	Lodging	Meal : Expenses :	Expenses -	
	Good Faith estimate  Actual Amounts	\$350	\$375	\$185		
7.	participation or b) the t	State whether a) the trip involves an event that is arranged or organized without regard to congressional participation or b) the trip involves an event that is arranged or organized specifically with regard to congressional participation:				
	The event was organize	ed without regard to c	ongressional participa	ation		
•			<u> </u>			
8.	Reason for selecting the location of the event or trip  HIMSS Annual Conference includes over 40,000 participants, and rotates annual among the few cities					
		ance includes over 40	,000 participarits, and		19 110 1011 011100	

20. Reason(s) for selecting hotel or other lodging facility:

HIMSS seeks bids and negotiates with hotels adjacent to the convention center where the conference is held. We choose based on consideration of price, location, accessibility to the conference, and availability of rooms to accommodate congressional staff.

Rosen Centre, Orlando, FL

	Describe how the daily expenses for lodging, meals, and other expenses provided to trip participants compares to the maximum per diem rates for official Federal Government travel:				
	Lodging rate is slightly lower than per diem and the meal expenses are comparable. However this event				
	Is organized without regard to congressional participation and the hotel is selected for reasons listed in				
	question 20.				
	Describe the type and class of transportation being provided. Indicate whether coach, business-class or first class transportation will be provided. If first-class fare is being provided, please explain why first-class travel is necessary:				
	Coach air transportation will be provided.				
	I represent that the travel expenses that will be paid for or reimbursed to Senate invitees do not include expenditures for recreational activities, alcohol, or entertainment (other than entertainment provided to all attendees as an integral part of the event, as permissible under Senate Rule 35).				
	List any entertainment that will be provided to, paid for, or reimbursed to Senate invitees and explain why the entertainment is an integral part of the event:				
	· · · · · · · · · · · · · · · · · · ·				
	None provided.  I hereby certify that the information contained herein is true, complete and correct. (You must include the completed signature block below for each travel sponsor.):

	None provided.  I hereby certify that the information contained herein is true, complete and correct. (You must include the completed signature block below for each travel sponsor.):  Signature of Travel Sponsor:  Name and Title:  Carla Smith, Executive Vice Presidnet  Name of Organization:  HIMSS  Address:  33 West Monroe Street, Suite 1700, Chicago, IL 60603-5616				

#### U.S. Senate Invitees:

- Stacy Amin (Senate HELP Committee)
   Lauren Arias (Sen. Udall)
- Brett Baker (Senate Finance Committee)
- Jordan Bartolomeo (Sen. Isakson)
- Morgan Brand (Sen. Schumer)
- Jennifer DeAngelis (Sen. Whitehouse)
- Eric Dempsey (Senate Finance Committee)
- Will Dent (Sen. Isakson)
- Marvin Figueroa (Sen. Warner)
- Ken Flanz (Sen. Crapo)
- Colin Goldfinch (Senate HELP Committee)
- Aimee Grace (Sen. Schatz)
- Elizabeth Henry (Sen. Cochran)
   Virginia Heppner (Senate HELP Committee)
- Lauren Jee (Sen. Cardin)
- Elizabeth Henry (Sen. Cochran)
- Adam Lachman (Sen. King)
- Kathleen Laird (Sen. Baldwin)
  Jane Lucas (Sen. Thune)
- Greg Mathis (Sen. Peters)
- Bobby McMillin (Senate HELP Committee)
- Brett Meeks (Senate HELP Committee)
- Patrick O'Neil (Sen. King)
- Madeleine Pannell (Senate HELP Committee)
   Stuart Portman (Sen. Hatch)
- Laurel Sakai (Sen. Blumenthal)
- Kripa Sreepada (Fellow with Senate Finance Committee)
- Sarah Smith (Sen. Klobuchar)
- Sarah Lloyd Stevenson (Sen. Wicker)
- Kara Townsend (Senate HELP Committee)
- Beth Vrabel (Senate Finance Committee)
- Beth Wikler (Sen. Franken)

#### Congressional Staff Agenda

Location: Orange County Convention Center, Orlando, FL February 19 – 23, 2017

Access Full Conference Information here: HIMSS17

All activities are at Orange County Convention Center unless otherwise noted.

All times are Eastern Time (EST).

## Monday, February 20th, 2017

10:56pm - Arrive in Orlando (Jet Blue 2323)

Tuesday, February 21st, 2017

7:00 – 8:15 AM	HIMSS Public Policy Leaders Breakfast
	<u>Location:</u> TBD
	<u>Description:</u> Breakfast with HIMSS public policy leaders, winners of the HIMSS Nichols E. Davies Award for Excellence in Health Information Technology, and the HIMSS Public Policy Committee.
8:30 – 9:30 AM	State Officials Session
	Location: 311E  Description: This State session provides the opportunity to hear from key state officials about the health IT public policy topics that they are addressing as well as the issues where they seek more information and input from constituents and key industry stakeholders
10:00 – 11:00 AM	Congressional Forum
	Location: Room 311 E
	<u>Description:</u> The Congressional Forum session provides the opportunity to hear from key Senate and House of Representatives staffers about the health IT public policy topics that they are addressing as well as the issues where they seek more information and input from constituents.
Open from 9:30 AM –	HIMSS17 Exhibition Hall with live technology demonstrations, presentations, and sessions
6:00 PM	Location: Orange County Convention Center,
(When not	<u>Location:</u> Grange County Contonion Conton,

data. Learn how current health IT products in the market deliver standards-based interoperability and health information exchange with an interactive learning experience.
Concurrent Education Sessions:
Location: Orange County Convention Center
Improving Clinician Mobility for Patient Care Delivery Clinicians are interested in the efficacy of using mobile devices. This presentation discusses findings from a pilot study aimed at achieving greater mobile flexibility and productivity in patient care. The innovation that was tested was an integrated set of wireless computing and docking technologies that automatically connects a mobile tablet computer to a mobile base station and other computer peripherals without the use of cables. We report on the benefits and challenges of the vendor agnostic solution framework, implementation process, and utilization for patient care.
OR
Importance of Narrative: Open Notes, Patient Stories, Human Connection This session will highlight the importance of preserving narrative and patient stories within the clinical encounter using a combination of stories, examples, and research to showcase how story amplifies the connection between patients and clinicians and improves care. We'll also examine the way that open notes impacts patients' perspective on their illness and their likelihood to take action around their health.
OR
Overcome Challenges/Obstacles to Achieving Interoperability Interoperability is getting due attention after most hospitals and providers achieved significant progress in meaningfully using EHR by coordinate care within and between care settings. The next step is to electronically communicate with providers delivering care for transient and local population at sub-acute, long-term care, home care, medical home and hospice environments across the continuum of care. This lecture covers the definitions, factors leading to selecting this topic, approaches used, desired vs. actual state outcomes and gaps, and formal structures (i.e. HIEs). It then expands to implementation steps, challenges from vendors, providers and patients and ways to overcome barriers, critical success factors, conclusions and outcomes, and recommendations to get the benefits of interoperability with an example.
Staff Led VIP Tour of the Interoperability Showcase
<u>Location:</u> Booth 9000   Hall F
Concurrent Education Sessions:  Location: Orange County Convention Center  It Starts with an Idea: Making Innovation Happen What do you do with an idea? In your organization, a lot is riding on that question.

The answer can have an immense impact on your ability to create a culture of innovation and turn an idea into reality. In this session, we explore how to recognize innovators inside your organization and gather game-changing ideas from them, how to evaluate these ideas from your innovators and assess their "fit" for your organization and how to construct a pathway for these ideas inside your organization.

OR

Renown Health's IT Transformation: A Model for Success
Healthcare organizations are faced with lower budgets and increased demands for

Healthcare organizations are faced with lower budgets and increased demands for higher customer service. This session focuses on the multi-year strategic approach to revamping Renown's enterprise technology platform to transform patient care.

#### OR

#### Advancing HIT Care Coordination in Long-Term Care

This session will illustrate how health information exchange improved care coordination between long-term and post-acute providers and hospitals

#### OR

# YourTurn: Creating Longitudinal Records Across Multiple Care Environments

In 2014 CHOC Children's created a vision for managing the health of their population. Since then they helped design tools to track chronic conditions that require little training and provide patients with a more preventative approach to care.

#### 12:30 – 1:30 PM Federal Health Community Lunch

#### Location: TBD

Description: A community of HIMSS members and Federal Government employees, coming together for cross-agency information sharing and networking, and to share new ideas on how health IT can be used to improve healthcare delivery by the federal government.

#### 1:00 - 2:00 PM

#### Concurrent Education Sessions:

**Location:** Orange County Convention Center

#### The Power of the Consumer-based Healthcare Approach

The image of an impersonal healthcare delivery setting must be retired. Becoming a consumer-facing healthcare organization offers many benefits—including fostering greater patient partnerships to drive care quality and outcome improvements—but there are key challenges to overcome on the road to improvement. A panel of experts will share customer insights and provide attendees with the tools needed to become leaders in the new healthcare landscape.

#### OR

#### eCQM Readiness and Challenges: An Essential Conversation

Electronic clinical quality measures (eCQMs) hold promise for minimizing data collection and reporting burden on providers while accurately reflecting the quality of care delivered. Delivering on this vision requires multi-stakeholder involvement in the development of standards, tools, and specifications that support eCQM

reporting.

OR

#### Electronic Consultations to Achieve the "Quadruple Aim"

Electronic consultation and referral (eCR) has improved access to specialty care, enriched primary care-specialty care provider communications, and enhanced care coordination. This session will discuss practical tools and approaches to implement and evaluate an eCR system. Participants will acquire better understanding of organization-specific adoption considerations, as well as Quadruple-Aim-focused evaluation methods for improving cost and efficiency, population health and clinical outcomes, patient experience and provider experience.

OR

#### YourTurn: Electronic Identification of Palliative Care Patients

Expert level palliative care management can ensure improved quality of life for patients with serious illness. It improves the quality of life for the patient along with reduced hospitalizations and total cost of care. Intermountain Healthcare developed an electronic palliative care identification algorithm which leverages historical and near real time data to early identify patients that would benefit from palliative care at the time of hospital admission.

2:30 - 3:30 PM

#### **Concurrent Education Sessions:**

Location: Orange County Convention Center

# Avoiding a Sophisticated, Targeted Breach: Critical Guidance for Healthcare Organizations

Advanced Persistent Threats (APTs) are no longer reserved for highly visible corporate entities. Any organization, regardless of size, can be targeted by a sophisticated and organized attack. Today, "victims" are being chosen and the targets are patient data, research data, hospital infrastructure and more. So, how are these organizational targets being identified?

OR

#### Mobile Innovations and Telehealth in Emergency Care

In the world of emergency medical services (EMS), ambulances help ensure rapid treatment and transport for millions of patients across the country. The model for this care, however, has not changed substantially in decades. Significant opportunities exist for more mobile and connected solutions to radically transform the delivery of pre-hospital care, improving clinical and economic outcomes for patients and community. There are virtually no existing, comprehensive benchmarks and evidence for how EMS should deploy these concepts.

OR

#### Senior Care Trending: Tech Case Study for Population Health

Six of the largest senior living companies in the United States, working with four highly innovative technology partners have teamed up to transform healthcare through IT. Leveraging wearable technology, advanced analytics, tablets and applications, use cases range from overall digital population health and wellness for mood elevation and increased mobility to identifying trending and quality of life, resident engagement and family advocacy and trust, in addition to clinician assessment and intervention and hospital readmission prevention. This study spans the continuum of care from independent living through assisted living,

	including memory care and skilled nursing.
4:15 – 5:30 PM	Federal Health Community Reception
	<u>Location:</u> TBD
	Description: Networking event for the Federal Health Community, a community of HIMSS members and Federal Government employees,
	Dinner on your own

Modpoedov Echruany 22, 2017

Wednesday, Fe	bruary 22, 2017
8:30 - 9:30 AM	Concurrent Education Sessions:
	Location: Orange County Convention Center
	Cybersecurity: Decisions, Habits, Hygiene What do marketing, psychology, and good hygiene have to do with cybersecurity? Most incidents in the cyber domain can be traced back to human error. According to a recent study, mistakes are cited as the root cause of half of data breaches in healthcare. Understanding the choices people make and the habits they rely on will help us understand the relationship between human error and cyber incidents, and spark discussions on how we can affect sustainable changes.
	OR
	Benefits of Tele-ICU Management of ICU Boarders in the ED Multiple benefits have been noted by our tele-ICU program: disease management by intervening early in acute situations, supplementary rounding to realize opportunities in disease management, population management of ICU patients and gap solutions in the process of delivering evidence-based medicine to our critically ill patients. After a serious safety event of an ICU boarder, we integrated ICU telehealth into the process of providing care for the boarded ICU patient.
	OR
	YourTurn: The Role of Risk Assessment in Value Based Purchasing MACRA and other healthcare policy initiatives have moved the dialogue around value from the theoretical to the real. The concept of risk is becoming a key factor in most approaches to moving to a value-driven model. Risk however, means different things to different stakeholders. This discussion will focus on risk from both a clinical and financial perspective to understand how it will be measured and used to adjust for both clinical and cost outcomes in this new environment.
Open from 9:30	HIMSS17 Exhibition Hall with live technology demonstrations,
AM - 4:00 PM (When not	presentations, and sessions  Location: Orange County Convention Center,

	<u>Location:</u> Booth 9000   Hall F

(When not attending concurrent educational sessions or for non-scheduled time)	<u>Description:</u> Explore a health ecosystem where standards-based health IT enables individuals to securely access, contribute to and analyze their own health data. Learn how current health IT products in the market deliver standards-based interoperability and health information exchange with an interactive learning experience.
10:00 – 11:00AM	Concurrent Education Sessions:
	Location: Orange County Convention Center
	Efforts to Assist Providers and Patients In Using Health IT for High Quality Care The concept of using health IT to provide high quality care has transitioned from vision to reality over the last few years. For nearly a decade, Office of the National Coordinator for Health Information Technology (ONC) has been working with consumer representatives, providers, and other stakeholders across the country to develop tools and resources that support their use of certified health IT to improve how care is being delivered. This session will outline ONC's tools and resources available to help providers and patients in the care delivery process, with a special focus on population & community health, workforce training, interoperability, consumer engagement, and practice transformation.
	OR
	No Patient Left Behind: Leading Transition to Modernized Capability Modernizing clinical capability and systems while meeting the current demands is a complicated process with patient safety and medical readiness risks. This session will describe the MHS approach to transitioning legacy applications to modernize systems. It will then go into the efforts and accomplishments of the transition to date and describe enterprise planning and the risks to patients. The session will end on how the health IT industry and the commercial world may apply approaches and lessons learned.
	OR

Next-Generation IT Governance: Fully Integrated and Operationally-Led The increasingly complex nature of today's healthcare environment makes effective governance more essential than ever. Challenges raised by issues such as the extension of IT systems to community partners and increased rates of mergers and acquisitions have rendered traditional approaches to IT governance disconnected and inoperative. IS-led IT governance, still the norm in most organizations, only frustrates efforts to link committees, coordinate responsibilities and properly distribute authorities. The solution to those challenges is a holistic approach to IT governance that allows for optimization of systems and resources to ultimately improve healthcare outcomes.

# Leveraging Technology for Financial Patient Engagement

Patient payment and collection practices are highly complex, and with high deductibles, patients have evolved into a primary payer source. On average, healthcare consumers are now responsible for 30% to 35% of their healthcare bill, and collection costs are significantly higher for patients as compared to payer collection. Traditional billing practices are obsolete, require analytics, and now have significant downstream debt risk. It is increasingly important to leverage predictive analytics for patient-centered financial discussions throughout the continuum of the Revenue Cycle.

11:30 AM -

**Concurrent Education Sessions:** 

## 12:30 PM Location: Orange County Convention Center Healthcare Consumerism: Understand the Person Behind the Patient Consumers are demanding an unprecedented level of personalization in every facet of their lives. This increasing demand challenges healthcare companies to think of patients as consumers, to see the person behind the patient. This session will discuss how to leverage insights and preferences to tailor the patient experience at every touchpoint. Organizations will share how they invested in cloud, mobile, social technology to transform engagement and empower patients to take a more active role in their care. OR The CIO/CMO Relationship: Keys to Leading and Thriving During Changing Times As cost and quality are increasingly measured not by care episodes but by overall patient outcomes, optimizing transitions in care has become a crucial focal point for health systems. Bringing together the expertise of both inpatient and outpatient domains ensures that the insights garnered from analytics fully address the continuum of care. OR Developing Health IT Leaders: A Statewide Collaboration This session presents the results from a statewide collaboration between the Virginia Chapter of HIMSS and the four state Project Management Institute (PMI) chapters undertaken in 2015 to develop and field a cross-training program for health IT project managers and healthcare practitioners. **Concurrent Education Sessions:** 1:00 - 2:00 PM **Location:** Orange County Convention Center RPM: is It All It is Cracked Up to Be? Remote Patient Monitoring (RPM) has been valued by some as a way to improve the quality and efficiency of care while improving provider and patient satisfaction. While there is general belief that these solutions enable healthcare organizations to better manage patients, does the evidence really support these conclusions? With the potential explosion of wearable devices and monitoring in real time a variety of conditions and purposes, is RPM the panacea some think it is? A national survey and case study of its use at CHRISTUS Health will shed light on these questions. OR Encore Presentation: Value-Based Care Delivery: The March to MACRA and Beyond This is a videotaped rebroadcast session. Value-based care initiatives are more important than ever before. Learn the latest insights from a variety of federal government agencies. OR IT-Enabling Population Health: A Journey, Not a Destination Providence Health & Services (PH&S) created the Population Health (PH) division in recognition of the growing percentage of its revenue tied to at-risk contracts for defined populations of patients. Within the PH division, the Office of

	Population Health Informatics (OPHI) was created to manage population health data coordination, quality measurement, advanced analytics, predictive modeling and IT collaboration. The OPHI also optimizes the ability of Providence's HIT applications to support population health management.
	OR
	YourTurn: Cybersecurity Challenges in Health Care Evolving cyber threats are requiring operations and security staff to rapidly adapt and respond. One way for a hospital to improve its response agility is by implementing cyber threat intelligence (CTI) information sharing programs. These programs rely on a network of other organizations with similar profiles to share data to better understand malicious actors. The talk, led by the NCCoE at the NIST, will explore best practices and guidelines.
2:30 - 4:00 PM	Roundtable Discussion with Federal Agency Staff (CMS, ONC, DHA, among others)
	Location: TBD
4:00 – 5:00 PM	Concurrent Education Sessions:  Location: Orange County Convention Center
	Pursuing Unlimited Mobile Opportunities with Bounded Resources The use of smartphones, tablets, wireless medical devices, mobile apps, etc., in healthcare is becoming pervasive. With so much opportunity, where does an organization begin? This presentation will look at the efforts of JFK Health System, based in NJ, which is taking a structured approach to get its arms around the mobile space.
	OR
	Portal Use Factors - The Keys to Patient Portal Adoption There is a premise that patient portals facilitate increased patient engagement. However, despite federal initiatives to promote the provision and use of patient portals, their overall adoption and use have been less than desired. Studies have identified various factors that affect patient portal adoption and use. This session will examine such specific factors and, through active audience participation, seek to identify practical interventions targeted at improving the use of patient portals.
	OR
	State Medicaid Agency Interoperability States' IT systems are critical for successful operation of Medicaid, the nation's largest public health insurance program. Increasingly, modular and interoperable Medicaid IT systems are becoming vital for promoting health outcomes of Medicaid beneficiaries and for reducing Medicaid program costs. While CMS, ONC and other federal agencies have issued guidance for interoperability in Medicaid, there still exists great opportunities for enhancements that are critical to achieving a true national, interoperable Medicaid. This session will discuss the critical areas of interoperability, how further guidance from HHS agencies can accelerate Medicaid Interoperability by states and how health information exchanges (HIEs) can be leveraged.
5:00 – 6:00 PM	Education Social Hour
	Location: Lobbies A/B, E/F

Description: A social hour to meet the education session speakers "up close and personal" and network with fellow colleagues
Dinner on your own

Thursday, February 23, 2017		
8:30 – 10:00 AM	Morning Keynote: Political Perspectives on America's Future Featuring	
	Speaker John Boehner	
	<u>Location:</u> Valencia Ballroom	
10:30 – 11:30 AM	Concurrent Education Sessions:	
	Location: Orange County Convention Center	
	Interoperability Matters: Impact on Mammography Outcomes While CIOs often hear about how better health data interoperability will improve outcomes and overall quality of care, the benefits are often stated as vague theoretical. A use case for interoperability directly improving care quality lies in mammographycloud-based mammogram image exchange networks provide secure, patient-portable accessibility of prior exams for more accurate interpretation of exams and improved patient outcomes at reduced costs. With increased availability of prior exams, which are essential for accurate interpretation of new mammograms because each patient's breast tissue is unique, quality of patient care and outcomes are improved, along with patient satisfaction. This interactive, educational session will share an interoperability use case in mammography, discuss how this model can be applied to other imaging-intensive specialties and how to develop enterprise-friendly medical image-sharing implementations that will pay dividends for patient outcomes.	
	OR	
	Round Peg, Square Hole: Old Regulations Meet New Technology Despite the government's repeated statements that it encourages technological innovation in the healthcare space, the application of old rules and regulations to new technology continues to stifle advancement in the field of healthcare IT and cause grave concerns for healthcare providers and healthcare IT entrepreneurs alike. This presentation will provide background related to the major statutes and regulations governing healthcare ventures, including the Stark law and the Anti-Kickback Statute, and discuss how those statutes and regulations have been applied in the healthcare IT space. The presentation will also provide practical advice on what to look for and what not to do to avoid government scrutiny.	
	OR	
	Smart Alerts in Healthcare: Real as Never Before In recent years, alarm hazards (e.g., excessive alarms, missed alarms, delayed alarms, etc.) was ranked as the #1 health technology hazard by the ECRI (Emergency Care Research Institute). EHR provides an unprecedented opportunity to use syndrome surveillance technology for the development of "smart alarms". This session will address "Failure to rescue" concept in clinical diagnostic alerts and also will outline the problem of information overload from unnecessary multiple clinical alerts while presenting some key potential steps to address this issue.

#### Mechanics of Cyberthreat Information Sharing

Cyber threat intelligence (CTI) sharing is a low barrier to entry, high return on investment method for improving an organization's cybersecurity maturity. Sharing actionable threat intelligence—to include known-bad IP addresses, URLs, and file hashes—with trusted partners creates a powerful defensive web that transforms one organization's detection into protection for remaining partners. In healthcare, CTI sharing benefits have not been fully realized. The technology has matured with the emergence of standards and supporting tools, and the timing is excellent for making demonstrable CTI sharing progress. This presentation will delve into the key tools and technologies that make CTI sharing possible; it will explain the Structured Threat Information expression (STIX) and Trusted Automated exchange of Indicator Information (TAXII) CTI sharing standards, describe current CTI sharing tools, and enumerate healthcare CTI sharing success stories and lessons learned for patient outcomes.

#### What's All the Fuss About Bundled Payments?

Bundled Payment Care Improvement (BPCI), a key component of the value-based payment programs proposed in the Affordable Care Act of 2010, is proving to be a viable methodology for providing high quality patient care at a more affordable price. CMMI (Centers for Medicare and Medicaid Innovation) is two-plus years into piloting the four models proposed within BPCI. CMS has already implemented one mandatory five-year bundle - total joint arthroplasty - in many areas of the country and more are expected. This important work cannot be accomplished without significant collaboration between clinicians and the IT/EHR teams.

#### MACRA Prep in Underserved Populations with Data-Centric HIE

With MACRA on the horizon, many providers are just beginning to understand the implications of this new payment paradigm. For large health systems and metropolitan networks, the transition will be enabled by ample financial, IT and educational resources. But, for rural and urban health providers serving medically underserved populations, the road looks more foreboding, complicated by smaller budgets and the lack of resources and IT expertise needed to make the transition. However, GA-HITEC, the rural HIE serving over 4000 rural PCPs and 56 critical access and rural hospitals in Georgia, is already developing innovative plans to ease the transition, serving as a model of excellence for aiding small, independent practitioners in rural areas. This session will discuss how implementing a datacentric approach to rural HIE development, backed with education and technical support, can streamline the MACRA transition.

#### Transforming Care Through a Consumer-Driven Model

With so many products and services at their fingertips, consumers are looking to industries like healthcare to provide a similar level of ease, convenience and speed. But for healthcare, it's more challenging; healthcare is a complex, high-trust relationship between the provider and consumer. As an integrated healthcare system, Kaiser Permanente is working to implement a holistic model of healthcare that is transforming this relationship. The model puts the consumer at the center of

5:00 PM

how we deliver on our mission of providing high-quality, affordable care. Kaiser Permanente is bringing design and technology together in our medical facilities to transform how members experience in-person care; as well as providing ways for members to engage digitally, anytime and anywhere, to manage their health. Done right, these pieces come together to form a connected, end-to-end experience that improves consumers' health as well as the cost and quality of healthcare. OR The Patient Room of the Future: Designing for Millennials People between the ages of 18-34 and 51-69 make up the largest percentage of the population. But while the demographics in our country have changed dramatically in recent years, little has been done to modify hospitals as a result, especially in the areas we spend the most time: the patient room. The need for a change in this space is further compounded by the fact recent analysis shows up to 30% of space within a typical patient room goes unused or underutilized. Using peer-reviewed research, design strategy and feedback from top healthcare institutions, NBBJ created a new patient room design that caters specifically to the needs of young and mature patients, while making better use of space and easing financial concerns. Taking cues from the micro apartments made famous in Asia, NBBJ developed a design that completely transforms the patient room to better care for patients, their families and providers, with features including a home office, dining room table for six people, a double bed and physiotherapy space. OR A Collaborative Approach to Supporting Integrated Devices This health system shares a case study in helping the anesthesiologist go paperless by integrating all the devices on the anesthesia machine to the patient's electronic medical record. This session will share key points and considerations in building the anesthesia with the necessary hardware to accommodate device integration including the workstation used by the anesthesiologists to access the EHR. This session discusses speakers' experience in getting buy-in from all stakeholders, including doctors, before the project began and creating a support model from the different teams involved in the project. 1:15 - 2:30PM Closing Keynote: Kevin O'Leary and Robert Herjavec, Stars of ABC's "Shark Tank" Location: Valencia Ballroom 3:00 - 4:30 PM Roundtable with HIMSS Executive Leadership Location: TBD

Note: Sarah Lloyd is extending her trip and HIMSS will not be paying for any cost associated with the extension.

Sunday, February 26<sup>th</sup>, 2017 8:53pm – Depart Orlando (Jet Blue 824)

Dinner on your own

#### U.S. Senate Invitees:

- Stacy Amin (Senate HELP Committee)
- Lauren Arias (Sen. Udall)
- Brett Baker (Senate Finance Committee)
- Jordan Bartolomeo (Sen. Isakson)
- Morgan Brand (Sen. Schumer)
- Jennifer DeAngelis (Sen. Whitehouse)
- Eric Dempsey (Senate Finance Committee)
- Marvin Figueroa (Sen. Warner)

December 22, 2016

Ms. Sarah Lloyd Stevenson Office of Senator Roger Wicker 555 Hart Senate Office Building Washington, DC 20510

Dear Ms. Stevenson:

I am pleased to extend this invitation for you to attend the 2017 Healthcare Information and Management Systems Society (HIMSS) Annual Conference and Exhibition in Orlando, Florida, February 19 – 22 (or February 20 - 23), 2017. This unique opportunity will allow you to learn about the potential and the challenges of healthcare information technology—including electronic health records, health information exchange, and mobile health—to help transform healthcare in America.

HIMSS is a global, cause-based, not-for-profit organization focused on transforming health through information technology (IT), providing health IT thought leadership, education, events, market research, and media services around the world. Founded in 1961, HIMSS represents more than 64,000 individuals, plus over 640 corporations and 450 non-profit partner organizations, that share this cause. HIMSS, headquartered in Chicago, serves the global health IT community with additional offices in the United States, Europe, the Middle East, and Asia. To learn more about HIMSS, please visit our website at <a href="https://www.himss.org">www.himss.org</a>.

The HIMSS Annual Conference and Exhibition is one of the healthcare sector's largest conferences. The 2017 HIMSS Annual Conference is anticipated to include over 300 educational events, 1,200 exhibitors, and over 45,000 attendees from the U.S. and around the world. Attendees include hospital executives, physicians, physician group practice managers, nurses and other healthcare providers, federal and state agency staff, public health agency personnel, state and local government representatives as well as technology vendors and consultants. To learn more about HIMSS16 and view a detailed conference brochure please visit <a href="https://www.himssconference.org">www.himssconference.org</a>.

During the conference, you may be especially interested in participating in a range of health IT policy events and discussions, including the HIMSS Interoperability Showcase, Cybersecurity Command Center, Connected Health Experience, Disaster Preparedness Knowledge Center, Federal Health IT Solutions Pavilion, and many other educational opportunities.

For the last ten years HIMSS has offered paid educational opportunities to selected policy makers to attend the HIMSS Annual Conference to learn about the public policy issues and challenges of the system-wide adoption of health information technology. Consistent with Senate and House of Representatives Ethics Rules, HIMSS is extending to you an invitation to

33 West Monroe St, Suite 1700 Chicago, IL 60603-5616 Tel 312 664 4467 Fax 312 664 6143 www.himss.org

attend HIMSS17 for up to three days (72 hours, excluding travel time). HIMSS does not employ or engage a registered lobbyist, lobbying firm, nor do we serve as a foreign agent.

Upon your acceptance of this invitation, we will provide the necessary documents to submit with your request for approval of privately sponsored travel to the Senate Select Committee on Ethics or House Committee on Ethics, as applicable. Requests must be submitted at least 30 days prior to travel (no later than January 19, 2017). HIMSS will also provide instructions to book your travel in compliance with the travel rules once approval has been obtained.

Paid opportunities to attend this unique educational event are limited, so if you will be able to attend please R.S.V.P. no later than January 6, 2017 to allow enough time for you to submit your request to your Ethics Committee at least 30 days prior to travel. Those responding will be accommodated on a first-come, first-serve basis.

If you have any questions, please feel free to contact me or David Gray at dgray@himss.org or

Sincerely,

Samantha Burch
